PHOTOPERIOD SENSITIVE SORGHUM-SUDANGRASS

ADV S6525 is an all-around elite hybrid. Place this hybrid in high-production environments. The photoperiod sensitive maturity allows for excellent multicut management without the risk of having grain production.

In systems that focus on single-cut management, this product is an excellent tonnage producer and can provide some flexibility in harvest timing. Areas with previous SCA pressure will benefit from elite tolerance levels.

- » Industry-leading Aphix™ sugarcane aphid tolerance
- » BMR-6 for top-end nutrition
- » Quick regrowth for multiple cuttings
- » Photoperiod sensitive maturity for maximum harvest flexibility
